SLIDING RAIL SYSTEM

208-580-1904
www.fishfighterproducts.com
The FFP Sliding Rail system will allow you to easily adjust the location of your rod holders, tackle trays, or just about anything you can think of. Getting your boat organized has never been easier.

Standard rail lengths of 24”, 36”, 72” as well as two mounting options (round mount or flat mount). Our round railing mounts can attach to hand rails 1” or 1-1/4” round, and the flat mount can be attached to any strong flat surface.

Once you decide on which length rail and how many rail sections / kits you want. You will need to select how many sliding blocks (sold separately) you want. You may also want to add on our adapter bracket so you can install any of our fish fighter storage trays.

Our Fish Fighter Series of Fish Rod Risers were designed with the help of our Pro Staffers and Professional Fishing Guides and mount perfectly on the Rail System Sliding Block.

It seems everyone wanted to have total control of Fishing Rod Placement on their boat. Many of us want to be able stagger Rod heights when trolling to help increase the spread of our gear.

FFP Rod Risers get the Rods out to the side of the Boat. By having Extended Rod Holders, I am able to move the Rods out and, in a sense, widen my boat. It’s nice now not having Rod Buts sticking out in the boat that get in the way when fighting a fish.
Block is made from solid marine grade plastic, pre-drilled and threaded for Folbe – Scotty -Attwood & Cannon rod holder.

FFP rails come with a wide stand off block for those wanting to install rails end to end in one continuous piece.

ITD5218 Rail System Adapter Bracket

Relentless Series™ Tackle Trays mount perfectly to the Rail System Adapter Bracket
Our Fish Fighter Series of Fish Rod Risers were designed with the help of our Pro Staffers and Professional Fishing Guides. It seems everyone wanted to have total control of Fishing Rod Placement on their boat. Many of us want to be able to stagger Rod heights when trolling to help increase the spread of our gear. I personally wanted my Fish Rod Extenders to get the Rods out to the side of my Boat further. By having Extended Rod Holders, I am able to move the Rods out and, in a sense, widen my boat. It’s nice now not having Rod Buts sticking out in the boat that get in the way when fighting a fish.

With all the combined experience of the guides we worked with, we feel we have designed the Ultimate in Fish Rod Risers and Fishing Rod Holder Extenders.

The Fish Fighter Fishing Rod Riser Is made from high strength marine grade aluminum that we machine right here at our facility. It also comes with an adjustable foot that will allow you to use as a way to support the Fishing Rod Riser and help to minimize Deflection. Each of our Fishing Rod Riser includes all the mounting hardware you need to install it onto your existing Rod Bases and also hardware to mount your Fishing Rod Holders to the other end. We also include our Exclusive Quick Mount™ Mounting Block. Our Quick Mount™ Mounting Block will allow you to easily remove your Fishing Rod Extension By simply pulling out on our locking pin. There no thumb screws that loosen up and allow your rod holder to fall out of the boat. This is a positive locking system that you can count on. For the Ultimate in Fishing Rod Placement we suggest you also use our Sliding Rail System.

The FFP Rod Risers have been named to provide quick information on which that someone may need.

For example: **ITD5270 Rod Riser 7”–14”**

This Fish Fighter Rod Riser Extends Out 7” and up 14”.
Install the Rod Riser base mounting block into the pre drilled holes of the rail system sliding block. Use the included 1-1/2” bolts.

Drop the Rod Riser main assembly in the slot. The indexing plunger on the Rod Riser base mounting block will lock it in place.
Certain models of the rod riser are available with a stabilizer leg. You can adjust it for extra support to Rod Riser.

FFP Rod Risers have perfect mounting holes for Folbe –Scotty -Attwood & Cannon Rod Holders.
